Partnership Announcement

Partnership: Cheese Merchants

Schreiber Digital Labs (SDL) is proud to announce the recent partnership with Cheese Merchants, a fast-growing, family-owned cheese company with a passion to automate and transform their warehouse through technology.

The HIVE, powered by SDL, will guide Cheese Merchants through this transformation initiative. As a company already thriving, we look forward to helping them to a state that increases their overall production and visibility to all things inventory related.

For more than 25 years, Cheese Merchants has delivered quality products at a fair price with exceptional customer service. We are thrilled to kickoff this partnership and can't wait to see what the future holds for this amazing company.
